Assignment 2 – Progress Review (2024)

Weight: 35%

Deadline: Your prototype should be 80% completed and should be demonstrated in the scheduled session

Submission: Submit the progress document to the given link on the courseweb.

All the members of the group MUST participate in the assessment, and absent members will **not** be given an additional schedule or marks.

Section 1: Project Progress (Prototype Demonstration) [30%]

Time allocated: Maximum of **20 mins** for the team to complete the demonstration

There should be an introduction to state the objectives, completed features and incomplete features. This should be based on ***the feedback received at the proposal presentation.*** [max 2 mins]

Each member must present the feature(s) that he/she is working on while demonstrating his/her component. Each member will be individually marked

All the features may not be fully completed, but you must indicate what is not completed, what should be completed, and how they should be completed.

Marking scheme

Section	Type	Marks
The GUIs (web pages, mobile UIs) ▪ UI [10%] – theme, structure, formatting, colors, fonts, images, menus and navigation ▪ UX [10%] – ergonomics, consistency, usability, informative	Group mark	10%
All the modules are **integrated** into a single system	Group mark	10%
Workflows – User stories are implemented as complete processes and demonstrated clearly	Individual mark	10%
Implementation (complete database should be available) ▪ *Create ▪ *Read, Update Delete ▪ SQL queries/Algorithms	Individual mark	40%
Identification and development of Innovative parts for the project	Individual mark	10%
Form validations (frontend + backend)	Individual mark	10%
Additional features (reports, search, etc.)	Individual mark	10%
Total		**100 %**

* e.g. register a customer, update the details of the customer, view registered customers...

Section 2 – Progress Document [5%]

- Clearly state the progress made by the group and the individuals, by the date of the presentation
- Number of pages: 5-15
- Submit the document to the correct link in coureweb after producing it for the evaluator.
- Follow naming convention (IT2080_Assignment 2_groupID) and upload a pdf file.
- Consider the given marking scheme to ensure that you have included relevant content.

Marking scheme

Section	Type	Marks
Progress: User stories or functionalities completed Repository (give the link to the merged branch)	Group mark	60%
▪ ER diagram ▪ Normalized schema ▪ Test case design, Network design ▪ High-level system design diagram ▪ Innovative parts of the project ▪ commercialization	Group mark	20%
▪ The module, which the member is working on ▪ The completion level of the features ▪ Work not completed and to be completed by final ▪ SQL queries used ▪ Algorithms, flow chart, pseudocode etc.	Individual mark	20%
Total		**100 %**

NOTE: In all above sections, if the individual contribution is not available, the group mark will not be given.
